Memorandum

EP 66-278

DATE: 28 December 1966

TO : The Files: Contract No. [REDACTED]

FROM : Mr. [REDACTED]

SUBJECT: Inspection Report No. 5 Service Contract [REDACTED]

25X1A9a

25X1A5a1

25X1A5a1

1. Project Description:

This is a battery service contract leading to information on various batteries.

2. Contractual Information:

- a. Initial Cost: [REDACTED]
b. Request for Procurement Action: 19 March 1965
c. Initiation Date: 1 July 1965
d. Completion Date: 30 June 1966
e. Deliverable Items: As specified under each work order.

3. Date Of Meeting: 19 December 1966

4. Place of Meeting: [REDACTED]

5. Persons Attending:

Agency

7. Comments:

The 12 V0500A environmental tests performed under work order No. 3 are complete. A summary of the monthly reports is being prepared. In general the battery performs well at the high charge rates but is sensitive to low temperatures (i.e. less than 43° F). Therefore, for protection throughout wide temperature ranges a c/4 rate is recommended.

The only other open work order under this task order is No. 14 for the development of an improved BS/A-13. This improved battery is designated BS/B-13 and two units are being evaluated.
